SAFETY AND PERFORMANCE INFORMATION

ECG Electrode Lead **BC-112B**

General

The BC-112B ECG electrode lead is used for monitoring ECG waveforms in EEG examination. Use the BC-112B ECG electrode lead only with a Nihon Kohden electroencephalograph.

Safety Information

A caution alerts the user to possible injury or problems with the instrument associated with its use or misuse such as instrument malfunction, instrument failure, damage to the instrument, or damage to other property.

Pay attention to all safety information in the Operator's Manual or Installation Guide.

Do not clean the lead or cable with hot water or chloric bleaching agent.

Do not use cresol and glutaraldehyde for disinfection.

Dispose of Nihon Kohden products according to your local laws and your facility's guidelines for waste disposal. Otherwise, it may affect the environment. If there is a possibility that the product may have been contaminated with infection, dispose of it as medical waste according to your local laws and your facility's guidelines for medical waste. Otherwise, it may cause infection.
